

AP Chemistry summer work for the year 2019-20

Book: Nivaldo Tro Chemistry A molecular approach

Take the self assessment quiz on page 34. (Answers on the bottom)

Read Chapter 1 pages 1-33. Concentrate on things that you got wrong in the quiz.

Do all key learning outcomes assessment examples, problems (in the section), and exercises mentioned on page 36.

Take self assessment quiz on page 75-76.

Read Chapter 2 pages 44-74. Again, you know what to review more.

Do all the learning outcomes assessment examples, problems, and exercises mentioned on pages 77-78.

Take the self assessment quiz on pages 126-127.

Read Chapter 3 pages 86-126.

Do all the learning outcomes assessment examples, problems, and exercises mentioned on p. 129.

No need to outline anything, and you should concentrate on the concepts that you do not remember or are completely new (very few should be). If you did not study Chemistry last year, it is very important to review the concepts in these 3 chapters.

I expect you to know all of this when we begin our journey in AP Chemistry world. If this feels difficult, the AP Chemistry is not for you.

Chapter 1-3 test is on the first week back.

See you then, prepared and ready to ROCK N ROLL!

Ms. Perttila
